Supp-Le-Milk

The Milk making Milk

**More Piglets
Stronger Piglets
Healthier Sows**

Or:

How to - quite simply -
help your sows, provide for your
large litters, and save you time
and money.

The Supp-Le-Milk® - Principle: So Easy – So Ingenious

Only
Supp-Le-Milk
replaces the
Foster Sow

The SUPP-LE-MILK-System shows you a completely new way to get a grip on large litters, starve-out piglets, stressed sows and high costs. Even more: SUPP-LE-MILK is not only incredibly easy and effective – but it also offers many additional benefits.

Revolutionary Solution

Supp-Le-Milk is different: No foster sows, no transferring, and no stressed out sows. Supp-Le-Milk is for where the problem arises and brings the garbled, natural feeding system back into balance.

Supp-Le-Milk strengthens the deprived piglets and starts a natural process that allows the sow to produce sufficient milk. That means more uniform litters, improved survival and healthy sows.

Revolutionary Milk

Supp-Le-Milk is high-performing milk effective in every way. It is specific to the Supp-Le-Milk-System and is adapted from the first days and approved by the piglets.

Supp-Le-Milk helps all the newborn piglets get what they need - From the first day until weaning!

Health Contains high-quality milk protein and digestible fat

Improves digestion Acidified to help ensure freshness and to increase digestive enzyme activity

Improves growth Enriched with Amino acids, Vitamins and Minerals to support/enable optimum growth

Cost – Effective the attractive price and minimal amount consumed allows you to feed Supp-Le-Milk to weaning and achieve a high return on investment.

Ingenious: The Supp-Le-Milk-System brings the Milk to exactly where it is needed!

Udder-Health-Management as the Basis

New Thinking in Pig Breeding

Supp-Le-Milk[®] Spiral of Success:

Minimal Investment – Sensational Results: Supp-Le-Milk is the initial spark which strengthens both piglets and sows. Now the entire litter can release its tremendous potential.

Stunning Advantages

No Foster Sows Necessary

Piglets remain with the sow!

Supp-Le-Milk comes to where it is needed: Manually or by Supp-Le-Milk milk cups directly in the crates. So smaller and deprived piglets get help and remain with the sow.

Uniform Piglets Homogeneous litters

The piglets of a litter remain together and Supp-Le-Milk supplies the additional opportunity for uniform development.

Improved Survival

The Supp-Le-Milk-System provides an additional drinking space directly with the sow – so all pigs are perfectly strengthened, and the survival rate clearly climbs.

Increased Weaning Weights

The uniform development of the piglets through Supp-Le-Milk provides simultaneously for an above average consumption of milk out of the teats of the sow – which encourages an optimal growth of the piglets.

Strong Sows

Less stress, more milk production, better sow condition

Supp-Le-Milk strengthens the sow. The teats are frequented not only of few strong, but rather all the piglets of the litter, what leads to an increased production of milk, less desolation and an optimal utilization of the sows milk.

You get more milk out of your sows, you save feed costs and at the same time wean more and heavier piglets.

Saves Time (up to 4 ways)

The Supp-le-Milk System with its practical cups is

1. Quick to install, 2. Needs little attention, 3. Leads to faster growth 4. Maximizes productive sow days / Sows are ready to use in a shorter period.

Saves Feed

Supp-Le-Milk saves on Supp-Le-Milk

The longer you feed with Supp-Le-Milk the less of it – in relation to the weight increase of the piglets is consumed. Supp-Le-Milk makes the piglets grow quickly.

Saves Farrowing Spaces

The Supp-Le-Milk-System needs no reconstruction and no extra foster sow spaces are necessary.

Adaptable No reconstruction required!

Whatever the building design or the arrangement of crates, the Supp-Le-Milk-System can be utilized. The flexible and simple feeding system adapts itself in every situation and size.

Easy Installation

The Supp-Le-Milk-System can be easily installed with normal tools and the simple instruction guide.

Very Affordable

The complete Supp-Le-Milk-System with its centralized control unit has a low cost price. In addition, this is even more of a bargain acquisition when you consider you save yourself reconstruction costs.

Foster Sows become unnecessary

Economical and Efficient

From the day of birth until weaning the Supp-Le-Milk System is economically wise.

Up to 80 litters can be supplied from each reservoir. Minimal effort to keep the Milk fresh and the System clean.

Within one year the Supp-Le-Milk System can pay for itself by marketing more pork from existing sow numbers.

The Supp-Le-Milk System in Use

You can increase the efficiency of Supp-Le-Milk by utilizing the Supp-Le-Milk-System. This is an easy-to-use feeding-system tailor-made for Supp-Le-Milk.

The Supp-Le-Milk feeding-system pumps the Supp-Le-Milk to where it is needed -

without this, you must decrease the number of piglets on the sow. Up to 80 litters can be supplied with each feeding system. This practice-tested system offers the highest levels of hygiene and comfort to you and can be installed and operated very simply by the farmer.

The Supp-Le-Milk-System and the use of Foster Sows in comparison
